

Buffalo – Red River One Watershed, One Plan (1W1P) Issues – We need your Input!

As members of the public who live and work in the Buffalo – Red River watershed, your input is needed to inform the development of a comprehensive watershed management plan. This plan will guide how water is managed in the watershed for the next ten years! In the spaces below, list **your top two issues** (e.g, flood damage, excess sediment in streams, lake clarity) that are important to you. The Planning Group has also developed a list of 30 watershed issues taken from Local Water Management Plans as well as other reports and studies. In **lines 3-5**, please indicate **your top 3 issues** from the list of 30 issues. Because the watershed is a big place, you can assign these issues to a specific planning region that you either live in or care about the most (See map on next page).

Issues

1. _____

2. _____

Emerging Issues

In the space below, please list what you see are emerging issues relevant to the Buffalo – Red River Watershed:

Top 3 from List of 30 Issues

Please refer to the Issues Table and use the maps displayed around the room for reference. The map key references a particular issue to an item(s) on a map.

1. _____

2. _____
