

September MCAP Webinar

Adapting to climate change in Minnesota agriculture

Please join us **Wednesday, September 23 at 12 pm** for a discussion about the impact climate change has on agriculture in our state.

In the face of a changing climate, Minnesotans are responding with innovative and collective efforts. To highlight these efforts, the Minnesota Climate Adaptation Partnership (MCAP) will be hosting a series of webinars about climate adaptation and resilience in Minnesota. These webinars will focus on knowledge, tools, and case studies from local leaders.

About MCAP

Hosted by the [Water Resources Center](#) at the University of Minnesota, MCAP is a multi-sector collaboration working to increase climate resilience in Minnesota. MCAP is dedicated to building the capacity of organizations and institutions across the state to adapt to a changing climate by sharing information and knowledge, promoting best practices, and connecting climate adaptation efforts and practitioners across sectors.
