Written Comments

Use this form to share a comment with the Buffalo-Red River Watershed District (BRRWD) concerning the United States Fish and Wildlife Service (USFWS) petition for the proposed Hamden Slough Refuge wetland modifications, which includes replacing the original culverts/gates with modified structures and raising the Homstad wetland 1’ above the "as-built" elevation. The structure changes will involve a branch to Becker County Ditch (C.D.) No. 15 and will only affect USFWS property. Overall, the modifications are expected to reduce flows downstream on the C.D. No. 15 system. The hearing will be held on Thursday, July 16, 2020, at 7:00 PM in the BRRWD's Barnesville office. Due to COVID-19 restrictions, routine public participation will be modified. We will provide conference call options, limited office attendance, and written comments via this form for the public to provide input on this proposal. The public can also call or visit the BRRWD office to discuss repairs.

Please provide your preferred method of contact (mail or email). *Note that any information provided is public data. While you are not required to provide your contact information, doing so allows the BRRWD to send you future information regarding this proposed project. If you wish to have your comments discussed at the hearing, please submit this form by July 15, 2020.
